Simple TouchScreen Operator Interface

No more memorizing keyed in data codes. Touch the screen for the information you want displayed. Operation of our user-friendly TouchScreen Technology is easy, just touch the screen to easily check the status of your system or make adjustments like inlet screen and discharge filter flush times.

Screen Features:

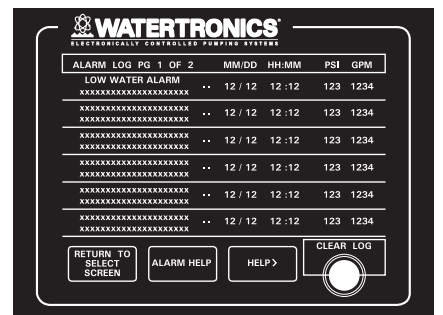

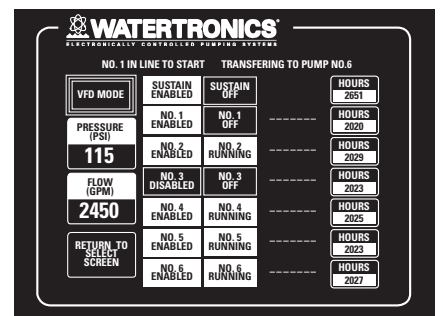

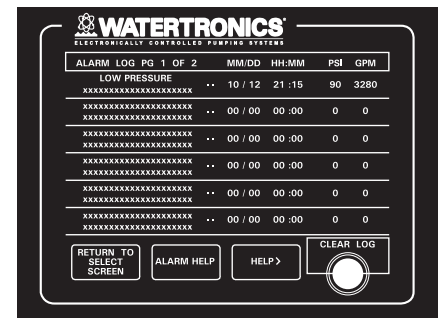

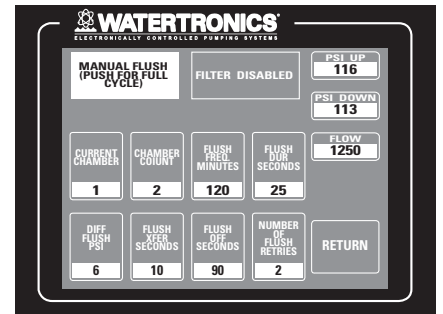

- Displays current pressure and flow
- Pump running status
- Auto restart status
- Analyzes system and informs operator when status is OK
- Displays the current Pressure Regulate Setpoint

Pump Screen Features:

- Displays readiness status of each pump
- Displays current running status of each pump
- Every pumps' total hours are displayed separately
- Touch to toggle between EBV and VFD Pressure Regulation
- Touch scroll through and select Lead Pump choice
- Displays current pressure and flow

Additional Screens Provide Access To:

- Real time trending of all critical pump station functions
- System calibration
- Adjustment of demand-based pressure regulation settings
- Pressure and flow set points
- Filter flush settings
- Alarm status with flow and PSI time/date stamps
- Graphic X-Y plotting of pump starts, stops, flow and pressure
- Graphic plotting of lake level
- Troubleshooting guide
