

# Watervision™

*remote monitoring software*

*Control....where you want it...*

A user-friendly monitoring software package, Watervision provides total control of your irrigation pump station. Combined with features such as PumpLink™, (which allows your pump station to communicate with irrigation central controls), Maintenance Manager™ (which allows you to manage and maintain your entire irrigation system), and operating via a Pocket PC, Watervision offers the versatility of operating and maintaining your system....anywhere, anytime.

Windows such as; System Overview, Alarm Paging, Trending, Fertigation, and System Maintenance are just a few examples of what you will find in our irrigation monitoring software package.

Keep up with the changing demands of your irrigation needs. Talk to a Watertronics representative about the features and benefits of this premium remote monitoring software and the expanded capabilities of PumpLink and Maintenance Manager.

And, with Watertronics' upgrades, Watervision is capable of operating on your current pumping system regardless of the brand.

*...when you want it*

# Clear, easy to understand and user-friendly is what you will find in the windows of Watervision.

## Overview

Full graphical operator interface.

## Trending

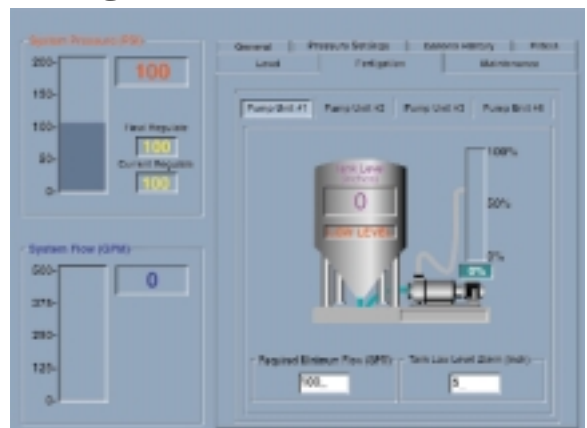

Graph critical information for system analysis
